- * 64-bit operating
- * Windows 7 or Higher
- * Virtualization is enabled

- * Oracle Virtualbox
- * Docker Engine
- * Docker Compose
- * Kitematic GUI

2

Docker Desktop for Mac

Docker Desktop for Mac

1. Docker Desktop for Mac

Docker Desktop

- * Mac Hardware -2010 model or newer
- * macOS 10.13 or newer

2. Docker on Mac using Docker Toolbox

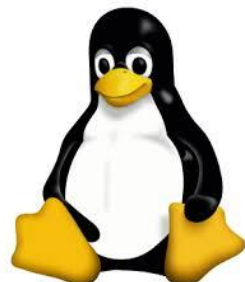

Docker Toolbox

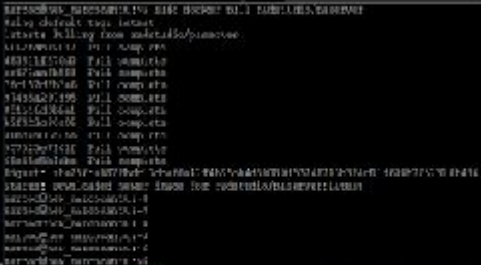

- * macOS 10.8 or newer

- * Oracle Virtualbox
- * Docker Engine
- * Docker Machine
- * Docker Compose
- * Kitematic GUI

Docker for Linux

Docker for Linux

- No matter your distribution of choice, you'll need a 64-bit installation and a kernel at 3.10 or newer.
- Kernels older than 3.10 do not have the necessary features Docker requires to run containers; data loss and kernel panics occur frequently under certain conditions.

THANKS!
